

403.02 A, Crack Sealant

Qualification Requests

On the laboratory test report that is sent in with the request, the test data must show that the material is in compliance with the material requirements.

Qualification Samples

The requirements for samples that are received for QPL prequalification are as follows.

- ◆ The producer will submit a minimum of one Thirty (30) Pound (13.6 kg) sample for each type of Crack Sealant Material to be considered along with test results from an independent laboratory.
- ◆ MDT will test each sample according to the tests outlined in subsection "403.02 A Crack Sealant ". The material will be rejected if the material does not meet the requirements.

Material Requirements

Requirements may be found in the Standard Specifications for Road and Bridge Construction subsection 403.02 A, the Supplemental specifications to Montana Standard Specifications subsection 403.02 A or contract Special Provision.
